OUR VISION

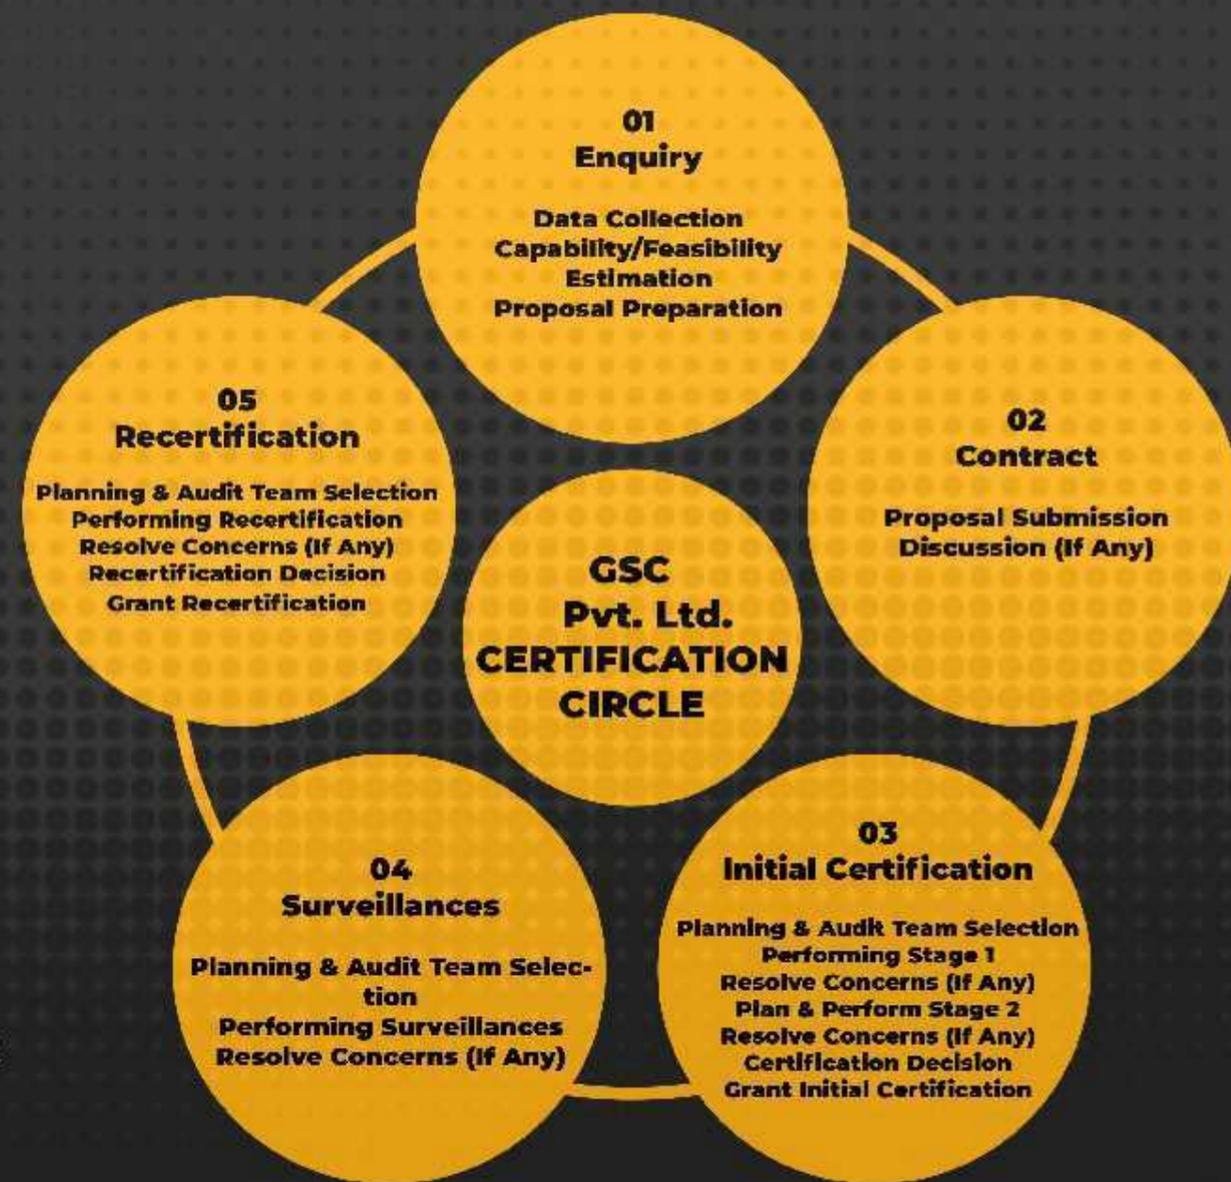

To be the first choice of first class organizations looking for strategic solutions with local services; leading to sustainable certification, training and inspection business excellence.

OUR VALUES

Professionalism
Respect
Recognition Integrity
Intelligence Dignity
Determination
Excellencewith
Enthusiasm

SCOPE OF OUR CERTIFICATION SERVICES

GSC (Pvt) Ltd. is providing accredited certification services in a smooth & structured way but obviously with no compromise on compliance of standards; absolutely in line with IAF Guidelines, as per Accreditors briefings & according to ISO 17021 (Conformity assessment standards) Below is our very simplified structured certification cycle/process.

INDUSTRY SECTOR SPECTRUM

Due to our professional standing & commitment to enhance standards compliance, we have delivered our services to almost all business sectors. Following is the spectrum of our industry/service sector, which shows our strength. This can be further validated through referring clientele section of profile.

STANDARD BRIEF

ISO 9001 Quality Management System

Following considerable publicity over the last few years, most companies are now aware that the badge of quality approval enhances their image in the business community and with prospective

customers. Demonstrating that a company has a quality culture to supply conforming products and services is an important management challenge.

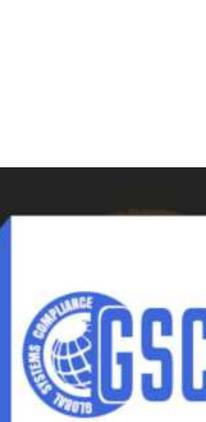

It is needless to say that an effective ISO 9001 Quality Management System can improve customer satisfaction, business

efficiency and achieve considerable cost savings, whilst positively enhancing your company image. ISO 9000 is the only standard in the history of mankind that has universal impact,

credibility and acceptability at the top of all standards issued by the International Organization for Standardization (ISO).

STANDARD BRIEF

ISO 14001 Environmental Management System

An Environmental Management System (EMS) is a framework that allows an organization to consistently control its significant impacts on the environment and continually improve its business operations. ISO 14001 is an internationally accepted standard that defines the requirements for establishing and operating an Environmental Management System. The standard recognizes that organizations can be concerned about both their own profitability and managing environmental impacts.

ISO 14001 integrates these two motives and provides a refreshingly workable methodology to achieve an effective Environmental Management System. In practice, what the

standard offers is the management of resource use and disposition. It's recognized worldwide as a means to control costs, reduce risk and improve performance.

It's not just a 'paper' standard—it demands the commitment of your whole organization

SCOPE OF OUR TRAININGS SERVICES

Lifting Appliances

Mobile Cranes, Over Head Cranes, Forklift Truck, Elevators, Block Chain, Block Lever/ Lever Hoist, Tower crane

Accessories

Chain Slings, Wire Rope Sling, Synthetic webbing Sling, Synthetic Round Sling, Synthetic Rope Sling, Shackles, Eyebolts, Jacks, Wire Rope Grip, Hooks, Clamps

Other Inspection Services

- 01 Textile & Textile Products Inspection
- 02 Oil storage tanks & oil carrying tankers
- 03 Elevator & Lifting Equipments
- 04 Welding Inspection
- 05 Food Inspection
- 06 Product monitoring QC
- 07 Pre- shipment inspection

WHT GSC Pvt. Ltd.?

GSC inspections brings along the following benefits

Assure the safety, performance and integrity of your Equipment and their components

Ensure compliance with all applicable regulatory requirements and safety standards Ensure that your equipment's and its components are regularly assessed, tested and

inspected at the right time and in-line with standards, such as the British/ASME Standards.

Verify the design of your equipment according to international design codes

Expert and up-to-date information and advice on the safety, testing, examination, servicing and inspection of the equipment.

GSC Equipment for Inspections

- Crane Load Scale/ Load Cell
- Hand yoke for MPI
- Laser range Meter
- UT meter for Ultrasonic Testing
- Wire rope tester
- Measuring Devices
- Tool Kits
- MARKING EQUIPMENT'S/ CONSUMABLE
- PPE's for Inspectors

Our People (Our Asset/Our proud)

With a blend of highly competent system assessors accompanied by technical, Occupational Health & safety, Food and environmental expertise, GSC Certification, all around the globe, provides internationally recognized products with local services. As stated in our mission statement we believe in values of professionalism, respect & recognition, integrity & intelligence, dignity & determination and excellence with enthusiasm & so are our auditors/assessors. Here is brief intro of our full time Auditors and Team members;

Mr. Haider, C.E.O of company & IRCA registered principle auditor. Mr. Haider holds wide experience of auditing all key business sectors against quality, OHS, environment, Food, information security & automotive quality management system standards. He is a seasonal value adding auditor with mechanical background & holding around 40 years working experience which includes a major portion of 20 plus years of auditing.

Mr. Zubair, Senior Manager Operations at GSC, an IRCA registered lead auditor with strong coverage of almost all business sectors, holding multiple backgrounds now like Telecom with strong qualifications & exposure of OHS & Food safety. Zubair is regularly conducting audits of quality, health and safety, environment & food safety throughout country.

Kamran Rehman is full time Food safety specialist also looking after quality audits at GSC. Kamran is an energetic & very go through auditor helping organizations to bring ultimate standards in their operations. He is always on go writhing country & abroad to meet real auditing challenges. Kamran had broad range of qualifications in his portfolio.

Furqan is very detailed character when it comes to auditing & exploring new areas. He is regular/Full Time quality auditor and also working in Manager HR capacity. Manager certification is part of time & managing certification scheme at national level is sciences & good auditing experience.

Hafsa joined GSC Pakistan in training department 3 years ago & now she is well conversant with auditing/Certification requirements. Currently Hafsa is looking quality audits along with training profile. She holds a master degree in human resource and very good auditor of service sector.

Ms. Nazia is working in manager certification capacity. Nazia holds multiple degree of different backgrounds and when her qualifications are combined with her professional attributes, she becomes a primary choice for customers seeking right type of certification and way to achieve it. Although Nazia is relatively younger in our environment but with her strong efforts in short span of time she has got a strong grip on all activities related to certification.

Saba

Saba has recently joined GSC Pakistan and looking for inspection services and personnel certification. A very important sector is totally under Saba profile. Within short span of time she has completed various big inspections projects which is big achievement for her.

Muhammad Atif

Mr. Muhammad Atif Ghuman joined GSC as a Lead Inspector for different Inspection services. He holds the degree of Master of Science in Petroleum Technology along with different certification including LEEA Level-II, ASNT NDT Level-II, OHSAS, QMS Certified, He has 12 years of valuable experience gained in the field of Oil and Gas Industry for quality control, Quality assurance, Material/Yard and Inventory Management, Logistics co-ordination, NDT/Lifting and Tubular Inspections.

Farooq

Mr. Farooque joined GSC Pvt. Ltd. as a Technical Inspector/Auditor. He holds the degree of Bachelor of Engineering (B.E) in Metallurgical and Materials. He has a work experience of more than 4 years in NDT/Lifting and Tubular Inspections. Moreover he is an approved auditor for ISO management system audits.

Ishaq

Mr. Ishaq is a long working fellow, joined GSC and now he is front fact of us to all our clients. Our valued customers are in very comfortable zone when it comes to taxation and finance issues due to professionalism and trustworthiness of Ishaq. He is looking after all accounts, administration issues and supporting certification activities with his best energies.

Trainers Group

Haider

Atif Majeed	Dr. Shahida Mushtaq
Atiq Ahmad Malik	Iftikhar Javed
ATTIQ UR REHMAN	Maryam Noreen
Brig Dr. Jaleel Anwar	Muhammad Farooq Khatri
Brig Muhammad Nafees Ul Haq	Mujeeb Mustafa
CHAUDHRY MUHAMMAD ANWAR	Raza Ali Khan
Dr. Irfan Mirza	Sajid Hameed
Dr. M Tamour Ashiq	SANAULLAH KHAN
Matti-Ur-Rehman Asad	Sara Amir
Dr. Sadia Atif	Waseem Khan

Specialization in Food Safety

As referred above, GSC Pvt. Ltd. has certified organizations of almost all sectors, so a growing list of clientele is our achievement. Please ask our staff for an updated client list. Few of our clients logos are shown on next pages for reference.

Inspection Clientele

Safety, Operation & Inspection of Elevator Lift

Safety, Operation & Inspection of Mobile Cranes

Safety, Operation & Inspection of Overhead Cranes

Safety, Operation & Inspection of Fork Lifters

Safety, Operation & Inspection of Lifting Accessories

Safe use of Scaffolding

Advanced Welding Techniques

Customized Training on Vehicle Technical Inspections &
NDT

Corporate Social Responsibility

On people life socially, morally & professionally (Through our trainings & evaluation) On our employees as a whole and on the communities of which we are part.

At GSC we believe that our activities have an impact that goes beyond our direct customers due to nature of our activities because we are Trainers & Evaluators. Our activities have an impact on:-

We understand corporate social responsibility as performing business activities ethically and socially responsible manner, while safeguarding growth and profit of our organization & community both.

As a leading provider of Quality, Occupational Health & Safety, environment & food safety auditor/trainer, we help businesses improve the way they drive, provoking new ways of working and incepting new ideas. Being a business entity

ourselves, we extend our support to reputable customers in sustaining their businesses by joining hands through different collaboration. As we believe that together we can bring a socially responsible culture in our society.

Keeping in view this, GSC Pakistan has launched a comprehensive CSR program under following main headings:-

1. Complementary Awareness session on different business, sustainability & management system related topics for organizations.
2. Encouraging & supporting 2020 Global Goals.

Heading Number 2 involves lot of internal KPI's & efforts but heading number 1 is a prime opportunity for

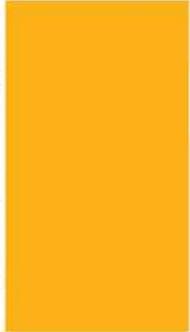

following sector/organizations to get their workforce an idea about a range of issue regarding sustainability, quality, health & safety, environment & food safety at absolutely no cost.

Also individual professionals, students, interns, Entrepreneurs are encouraged to increase their knowledge base through participation in programs offered through this initiative.

Initially proposed pool of topics for our CSR awareness sessions in given below, we can customize topics also as per specific requirements & will keep on adding more to it.

Initially these programs are being offered on Friday (2nd half - 2:30 to 5:30 PM) at our main office in Islamabad on a query/interest base arrangement with coordination between our training administration staff & organizations/individuals interested. Later on it will be extended to organization premises & other cities keeping in view the logistic/resources involved.

STANDARD BRIEF

HACCP (Hazard Analysis & Critical Control Points)

HACCP--Hazard Analysis and Critical Control Point (HACCP) is a systematic approach to identifying and controlling hazards (i.e. microbiological, chemical or physical) that could pose a threat to the preparation of safe food.

HACCP involves: identifying what can go wrong planning to prevent it making sure you are doing it. In simple terms, it involves controlling ingredients and supplies' coming into a catering business and what is done with them thereafter. Pre-requisites Before implementing HACCP, basic food hygiene conditions and practices called prerequisites must be in place in a food catering business.

HACCP will then be used to control steps in the business which are critical in ensuring the preparation of safe food. HACCP uses an approach to food safety which concentrates a caterer attention on the causes of food safety hazards. This allows a caterer to identify and control food safety hazards. The advantage of an effective HACCP team is that members tend to have in-depth knowledge of all aspects of the operation which reduces the risk of details being overlooked. In addition a team setup will instill ownership of HACCP by the catering business.

Examine the business and make sure all members of the HACCP team are familiar with its daily food preparation procedures.

Cleaning and Sanitation

Maintenance

Personnel Hygiene

Pest Control

Plant and Equipment

Premises and Structure

Services (compressed air, ice, steam, ventilation, water etc.)

Storage, Distribution and Transport

Waste Management

Zoning (physical separation of activities to prevent potential food contamination)

In recent years number of food sector companies had implemented HACCP as a basic control tool for their operations. Very important aspect is that HACCP certification now only possible in integration of ISO 9001 as per guide lines of UKAS.

STANDARD BRIEF

BS OHSAS 18001 Occupational health & Safety Management System

OHSAS 18001 is the sound solution to the ever increasing challenge facing most organizations due to high injury and illness, lost work days, increasing occupational health and safety regulations, large citations/penalties, rising workers compensation costs, costly medical claims, worker retention and employee satisfaction. Real world operating experience shows workers compensation claims to be spiraling upward.

Workers Compensation Medical claims have soared to a record 3.6 billion over the last decade. Traditional occupation health and safety management usually meant reacting to work related incidents rather than planning for the control

of work related risks that compose OHSAS 18001:2007 certified organizations. Other costs facing organizations include, but are not limited to, investigation time, wages paid for lost time, clerical time, decreased output of the injured worker upon return and the loss of business and goodwill. Organizations that have been the pioneers in attaining OHSAS 18001:2007 already

report realized benefits of increased operational benefits, reduction in lost work days, fewer accidents and medical claims, recognition by insurers and regulars and improved worker retention and satisfaction.

Employees have responded favorably to registered organizations overt commitment to continued occupation health and safety improvements. Enhanced employee awareness and individual commitment to occupational health and safety has served as the basis for positive organizational change. Much of the improvement is attributed to employee

education and awareness of safety issues and understanding. This increased awareness has been the key factor for OHSAS 18001 organizations saving in legal expenses, building damage, tool and equipment damage, product and material damage and production delays and interruptions.

Bottom line improvements for organizations that have a registered OH&S management system include efficient organizational discipline, employee awareness and satisfaction, recognition by insurers, lower workers compensation and medical costs and increased control of regulatory issues.

CSC certification offers UKAS accredited certifications services (Accreditation Number 8327) for OHS management system for all key hazardous areas.

STANDARD BRIEF

ISO 27001 Information Security Management System

The ISO 27001 standard was published in October 2005, essentially replacing the old BS7799-2

standard; it is the specification for ISMS, an Information Security Management System' then again revised in year 2013. It was the first

standard on High level Annex SL structure published by ISO. BS7799 itself was a long standing standard, first published in the nineties as a code of practice. As this matured, a second part emerged to cover management systems. It is this against which certification is granted. Today in excess of a thousand certificates are in place, across the world. The objective of the standard itself is to "provide a model for establishing, implementing,

operating, monitoring, reviewing, maintaining, and improving an Information Security Management System". Regarding its adoption, this should be a strategic decision. Further, "The

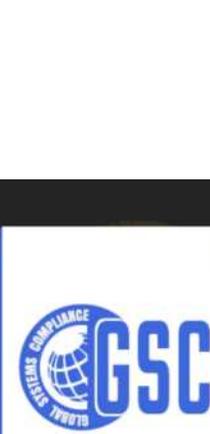

"The design and implementation of an organization's ISMS is influenced by their needs and objectives, security requirements, the process employed and the size and structure of the organization". The standard defines its 'process approach' as "The application of a system of processes within an organization, together with the identification and interactions of these processes, and their management". It employs the PDCA, Plan-Do-Check-Act model to structure the processes. Information is critical to the operation and perhaps even the survival of your organization. Being certified to ISO/IEC 27001 will help you to manage and protect your valuable information assets. ISO/IEC 27001 is the only auditable international standard which defines the requirements for an Information Security Management System (ISMS). The standard is designed to ensure the selection of adequate and proportionate security controls. This helps you to protect your information assets and give confidence to any interested parties, especially your customers. The standard adopts a process approach for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving your ISMS.

GSC Certification has rendered ISO 27001 UKAS Accredited certification services to organizations in Pakistan which holds big data banks like NADRA, SECP & Stock exchanges.

STANDARD BRIEF

ISO 22000:2005 (Food Safety Management System)

ISO 22000:2005 is an international standard that defines the requirements of a food safety management system covering all organizations in the food chain from (farm to fork). The standard combines generally recognized key elements to ensure food safety along

the food chain, including: Interactive communication Systems management Control of food safety hazards through pre-requisite programmes and HACCP plans Continual improvement and updating of the food safety management system.

ISO 22000:2005 is a truly international standard suitable for any business in the entire food chain, including inter-related organizations such as producers of equipment, packaging material, cleaning agents, additives and ingredients. ISO 22000:2005 is also for companies seeking to integrate

their quality management system, for example, ISO 9001:2008 and their food safety management system.

GSC Certification has a reasonable client share for ISO 22000 certification services to organizations of food sector in Pakistan plus GSC has very specialized experience of Retail/Catering & manufacturing 2nd party supplier and retail auditing which is briefed in relevant section later in profile.

STANDARD BRIEF

STANDARD BRIEF

**ISO TS 16949
(Automotive Manufacturing)**

TS-16949 is highly cost effective for companies with following ways:

- Continual improvement
- Defect prevention
- Reduction of waste
- variation in the supply chain

We offer ISO TS 16949 certification which is an international standard and "technical specification". It plays an important role where technical specifications are crucial. This certification is required for establishing and maintaining a quality management system for the design and development, production and installation and service of automobile-related products.

ISO TS 16949 is a specification, tailored to meet the automotive manufacturer requirements; particularly quality, cost and JIT (Just in time) delivery.

Halal Food Certification

Halal certification plays a key role in food and beverages industry. This certification indicates that the food product is assured in terms of religious compliance, safety and hygiene. Halal certification is a motivation to gain religious benefit, customer satisfaction, provide more job opportunities and avoid social problems. In financial capital, it serves as an internal resource to boost sales and influence customer's purchasing decision. Under the Halal Management System Program, establish your organization among those following practices in accordance with Islamic Laws.

GSC gives Halal certification, information, knowledge and **halal certification training** to capture the Halal market in the world. GSC certify the entire process from the beginning till the end of the production which involves supply chain services, the extraction of raw materials, method of preparation, input process inspect till the finished point.

The global halal industry is estimated to be worth around USD 2.3 trillion. Growing at an estimated annual rate of 20%, the industry is valued at about USD 560 billion a year thus, making it one of the fastest growing consumer segments in the world. The global halal market of 1.8 billion Muslims is no longer confined to food and food related products. The halal industry has now expanded beyond the food sector to include pharmaceuticals, cosmetics, and medical devices as well as service sector components such as logistics, marketing, print and electronic media, packaging, and financing. This development has been triggered by the change in the mind set of Muslim consumers as well as ethical consumer trends worldwide.

A Halal certification can also be proven as an effective marketing tool for the Food production industries, which involves food manufacturers, hotel chains, restaurants, coffee shops, café etc. When the company gets Halal certificate from an authority foundation, it shows the customers that the relating company produce in a high quality level product, because the Halal Certificate contains the most ultimate level quality standards. So, it is a very significant tool for the company and takes advantage than other competitors.

Dependent on a variety of diverse factors, ranging from organization size to existing practices, accreditation usually needs 3-6 months for small scale operations and 8-12 months for larger businesses.

In our modern society, it is important that the devices we use to measure the physical quantities around us are accurate. From the weather to the medical field, from the automotive industry to agriculture, obtaining accurate measurement is essential in making decisions and performing tasks.

Pressure Calibration

GSC provide following services for pressure calibration:

- Pressure gauges
- Pressure indicators
- Pressure Transducers
- Manometers

Temperature Calibration

GSC brings you following services for temperature calibration:

- Thermometers
- Infrared (IR) thermometers
- Temperature sensors
- Thermocouples
- Digital thermometer with TC and RTD sensors

Mass Calibration

GSC brings you followings services for mass calibration:

- Analog and digital weighing scales
- Analytical Balances

Length Calibration

GSC brings you following services for length calibration:

- Vernier caliper, height and depth gauges
- Steel rulers
- Meter tapes and meter sticks
- Micrometer all types
- Feeler gauges

Volumetric Calibration

GSC brings you following services for volumetric calibration:

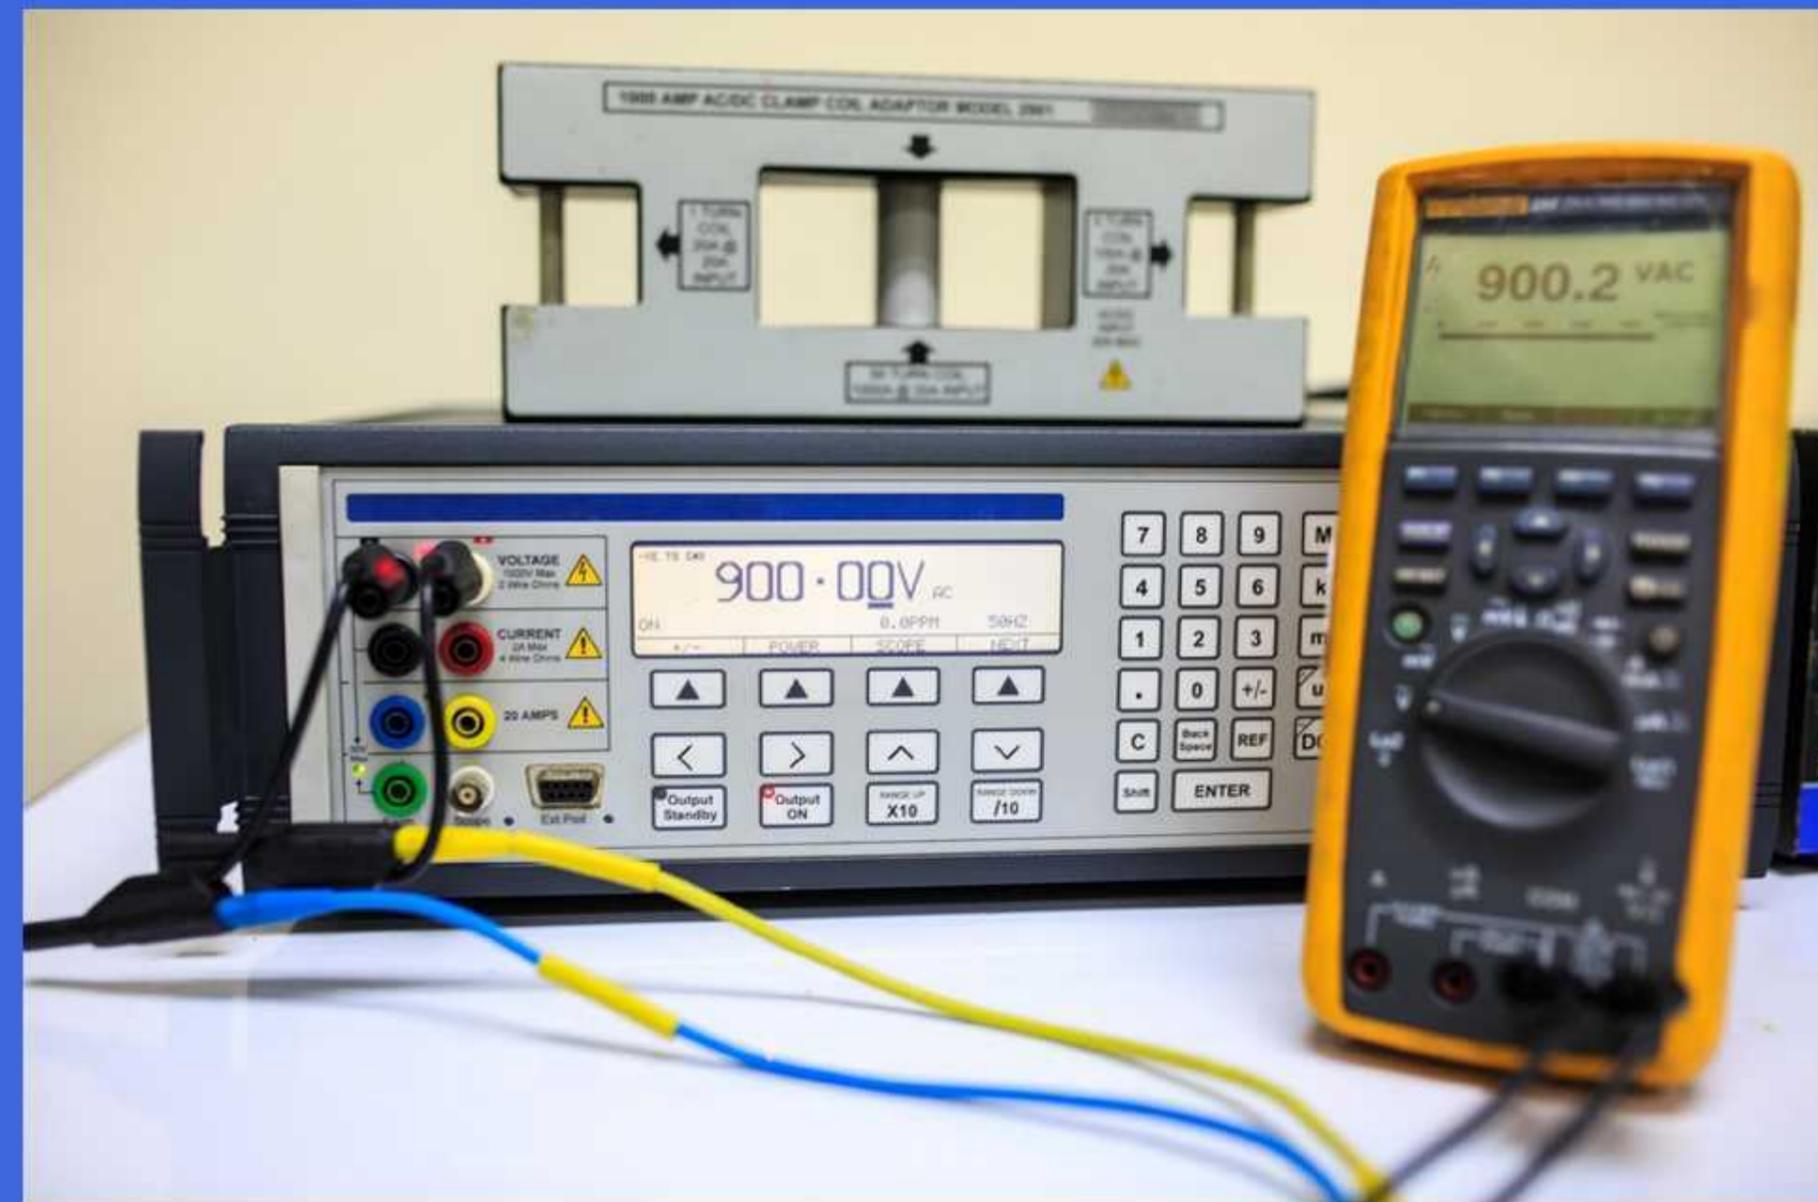

- Volumetric flasks
- Graduated cylinders
- Beakers, volumetric pipette, burettes

Electrical Calibration

GSC brings you following services for electrical calibration:

- Analog / digital multimeters
- Volt and Ampere meters
- Clamp meters
- Decade resistance, capacitance and inductance.
